DESCRIPTION The LR60, 40m strip light provides 130 feet of continuous LED lighting with 24V power from one end, forget the hassle of multiple wire runs and splicing small strips together. With the ability to run 130ft in one connection long runs are made much easier with less wiring and less work. An IC constant current design provides consistent illumination with no voltage drop. On board are surface mounted 2835 chips that run cooler, brighter and longer than their 3528 style predecessor. A low power output of only 0.81 watts per foot and standard lumen output up to 101 lumens per foot make this strip extremely efficient and bright enough for most lighting application.
