

Small dimensions, easily release heat, simple assembly, lightweight, environment friendly.

Patent Number: US D621,091 S

Intertek

Fixture Certified to NSF 2 standards
when assembled by KLUŠ

Closet Rated

- Designed to reach an IP67 waterproof rating
- Ability to obtain a line of light
- Good heat dissipation
- For multiple applications
- Housing for LED strips up to 0.39' / 10 mm wide

FINISH :

- Non anodized (raw) 
- Silver anodized 
- Black anodized 
- RAL

TECHNICAL SPECIFICATION

Application

- designed for the construction of lighting fixtures and backlighting luminaires. In furniture, exhibition, interior design elements like stair treads, platforms, shelves, niches, etc.
- can be embedded in narrow grooves
- can be used for external illumination in the sealed version, except for applications where it would be exposed to considerable mechanical forces

Assembly

- can be mounted with appropriately selected mounting adhesives, professional double-sided adhesive tapes, metal and plastic mounting brackets, as well as adjustable mounting brackets

Also it can be mounted to drywall panels with the use of **PDS** mounting spring.

Additional information

- suitable for bending in the plane adjacent to the LED strip
- can be equipped with transparent and frosted covers, aluminum-colored plastic, metalized and conductive end caps
- extrusion can be made waterproof (IP 67) and be used as an outdoor lighting for elevations or architectural elements of gardens
- lighting or illumination of certain areas (stream of light may vary depending on the power of applied LEDs)
- extrusion acts as the connector between the light source and the application area and provides a stylish and finished look
- spece for LED strip: 0.40" / 11.2 mm

Extrusion bending

Minimum internal radius	Minimum external radius
150 mm / 5.9"	250 mm / 9.8"

- Minimum radius – bending radius which when exceeded causes destruction (deformation, bending or lack of compatibility with other accessories, e.g. covers, end caps, etc.) of the profile.
- Internal radius – refers to the extrusion bent so that the cover is facing the inside of the arch.
- External radius - refers to the extrusion bent so that the cover is facing the outside of the arch.
- Irregular curves are possible after consultation and individual quotation.
- When bending anodized extrusions, one should be aware of cracking of the anode coating (which may be more or less visible depending on the radius).

Possibility of making a linear fixture with IP65 protection, which means the fixture is dustproof and waterproof in contact with water jets.

Possibility of making a linear fixture with IP67 protection, which means the fixture is dustproof and waterproof.

Turn off LED lights during peak day light hours in outdoor applications to avoid excessive heat buildup which will result in diminished LED life.
