SPECIFICATIONS

Product SKU : WW-LG-RGBW-F2
LED Type: Epistar RGB 4in1
LED Quantity : 6 x 8Watt LEDs
Input Power : 24VDC Constant Voltage
Watts : 48W
Operating Temp : -35° ~ 131°F
Operating Lifetime: 50,000 Hours
Beam Angle : 60°
Rating : IP65
Warranty Period : 1 Year

Input Power: 24VDC Constant Voltage

Power supply equation

$$X * 48.0 = Y$$

X = amount of LED fixtures

Y = minimum transformer wattage

PRECAUTIONS

WARNING - This product should be installed, cut and connected only by a qualified professional.

NEVER cut, connect, or join wires while product is connected to a live power source.

24VDC Use 24VDC Input Only!

DO NOT daisy chain more than 3 RGBW fixtures without providing 24VDC power every third fixture.

*see installation guide

DO NOT use AC Input!

DO NOT operate in any environments over 131°F.

This product is not designed to be submersed or installed in areas with standing water.

BE CERTAIN your 24VDC source, RGBW controller and wire gauge is suffice for power load.

Bright Star 4 in 1 RGBW LED Flood Light - 24VDC

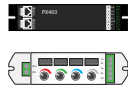

SKU: WW-LG-RGBW-F2

INSTALLATION

REQUIRED SUPPLIES

Wrench and mounting supplies

24VDC RGBW Controller or 4CH DMX Driver

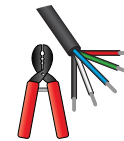

24VDC Power Supply

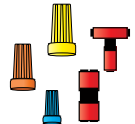

OPTIONAL SUPPLIES

80' RGBW Flood Light Jumper Wire

Outdoor Wire and Wire Strippers

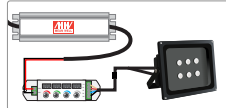

Wire Nuts or Connectors

1.) Mount Fixture

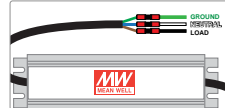

Mount your RGBW Fixture to a secure surface. If possible mount the fixture where it can be slightly gaarded from UV and outdoor elements.

2.) Connect Controller

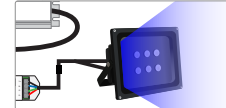

Always be certain power is disabled before connecting! Connect the 5 pair wires from the fixture to your RGBW controller, then the 2 pair wires from power supply to DC input.

3.) Connect Transformer

WARNING – This step should be done by a qualified professional. Always disable AC power before connecting! Use wire nuts or connectors to secure your AC input to your 24V transformer.

4.) Turn on Power to Test

Once the light has been wired and mounted you can now turn on power to your 24VDC source. Repeat these steps and use parallel connections for multiple fixtures.

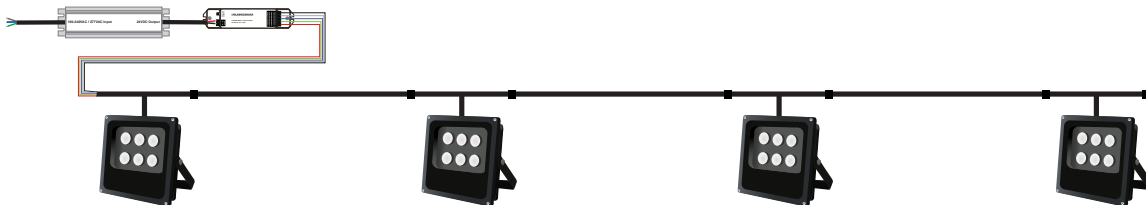

5.) Adjust Light Position

Once the light has been wired, mounted and tested you can now adjust the angle of the fixture for ideal light output. Tighten bolts on each side to secure.

CONNECTION EXAMPLES: 48 Watts per fixture

✗ Do NOT Connect this way! (No more than 3 fixtures in serial connection)

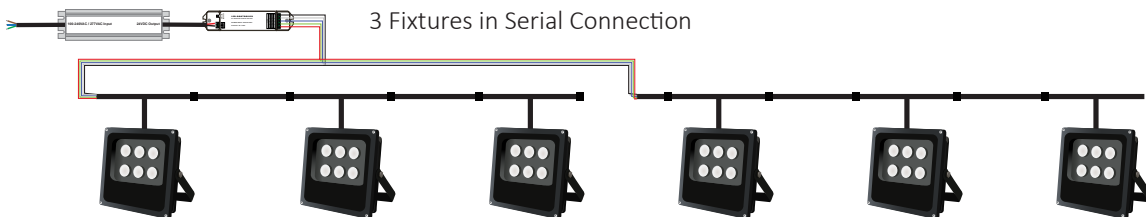

✓ Do Connect these ways!

6 Fixtures in Serial Connection with looped circuit

3 Fixtures in Serial Connection
