

PRODUCT DESCRIPTION

- Hides the light source - the brightest, contrasting element of the lighting fixture.
- Narrow light angle.
- The recessed cover eliminates the gleaming effect.
- Allows the use of more efficient, transparent covers without compromising the aesthetics of the lighting fixture (LED points remain invisible).
- Allows you to create continuous light arrangements.
- An extensive range of fasteners.

TECHNICAL SPECIFICATION

Application

For use in interior architecture.

For creating linear lighting fixtures, continuous light arrangements.

For backlighting components where the light source is to remain hidden.

Assembly

Mounted to the surface with appropriate mounting adhesives, mounting springs and screws.

Suspended with the UCHO-ZM fastener or the PUSZ system.

Additional information

- spece for LED strip: 0.56" / 14.4 mm

The advantages of the lighting fixture can best be observed with the black finish of the profile walls. We recommend the anodized black satin finish. The fixture minimizes glare without causing discomfort. The source of light is concealed in the PDS-ZMG extrusion which makes larger interiors with a large number of lighting fixtures more comfortable, as your eyes are not exposed to the brightest part of the fixture.

It can be equipped with transparent or frosted covers We recommend use in the kitchen under cupboards,

especially in open kitchenettes; wherever you can see the lighting fixture from a sitting or lying position or from a child's height.

The fixture can be equipped with transparent or frosted covers.
