DESCRIPTION

Our Ribbon Star Dim to Warm Strip Lights are available in IP20 indoor or IP67 silicone coated outdoor. They have special design to warm the color temperature of the light as it is dimmed. This makes the light ideal for mood setting as well as matching the natural environment of traditional lighting used by humans throughout time. The highest brightness is ideal for active and task lighting, while the dimmer light settings warm in color temperature to provide mood lighting for entertaining and relaxing. Each roll is 16.4ft (5m) in length and can be cut and re-connected every 3.94" (10cm). 24VDC power and 5.85 watts per foot of strip is required for powering, dimming can be achieved using any PWM dimmer or dimmable power supply.
