

RGB LED Zone Controller and Receiver Guide

Use this button to pair
Receiver to RF Remote or
WiFi Controller.

Maximum Output

6A x 3CH Max Output
12VDC-216W Max
24VDC-432W Max

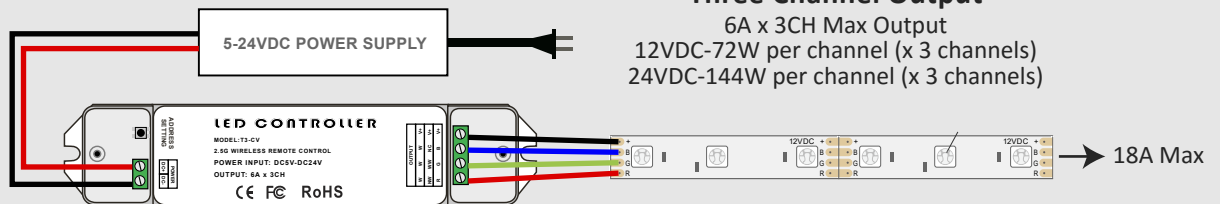

Connecting with RGB Color Changing LEDs

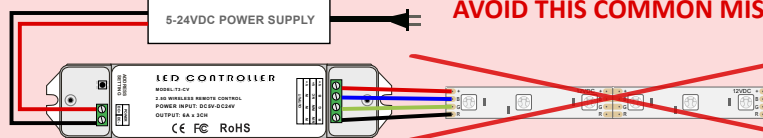

Three Channel Output

6A x 3CH Max Output
12VDC-72W per channel (x 3 channels)
24VDC-144W per channel (x 3 channels)

AVOID THIS COMMON MISTAKE

- 1.) Apply 5-24VDC power to your wireless receiver
- 2.) Turn on power to your T3M remote
- 3.) Press the address setting button once on your wireless receiver and let go
- 4.) The small address setting indicator light will turn solid red
- 5.) Immediately press and hold the zone number on the T3 remote that you wish to pair to
- 6.) Hold until you hear a long beep
- 7.) The LED light on the T3M remote will flash 3 times
- 8.) Your wireless receiver is now paired to that zone
- 9.) Repeat this process for multiple zone receivers
- 9.) To un-pair a receiver press and hold the address setting button for 5 seconds until a long beep
