BENEFITS OF LED PAR38 BULBS OVER INCANDESCENT

PAR38 LED Bulbs are available in bright white (6000K) and also warm white (3000K).

You Save the Environment:

- LED Light Bulbs contain no Mercury or any other harmful gases or chemicals.
- LED Light Bulbs take less energy than incandescent, halogen, and fluorescent bulbs in turn not only save you money but also precious energy resources.
- You do not have to change or dispose of your LED Light Bulb for over 8 years. (Running 12hrs per day)
- Approximately 95 percent of the power consumed by an incandescent lamp is emitted as heat, rather than as visible light.
- Fluorescent bulbs contain small amounts of mercury which are released as poisonous vapors if the tubes are broken
- LED Bulb will last over 35 times longer than incandescent.

You Save Money:

75W INCANDESCENT COST AT 35,000 HOURS

Product Cost, 35 bulbs: **\$34.99**

Power Cost: + **\$393.75**

\$428.74

17W LED COST AT 35,000 HOURS

Product Cost, 1 bulb: **\$49.99**

Power Cost: + **\$89.25**

\$139.24

ENERGY COST AT
\$0.15/KWH

\$428.74

- **\$139.24**

\$289.50

SAVINGS AT 35,000 HRS,
AFTER PRODUCT IS PAID FOR.

At the minimum lifetime span of 35,000 hours the LED PAR38 Bulb not only pays for itself in energy savings, but also saves an additional \$289.50 in energy costs when compared to a 60W incandescent at \$0.15 per kWh. Not only would you have to replace an incandescent bulb more than thirty five times as often as an LED bulb, but you could also potentially have an additional 10,000 hours left in the LED bulbs operating hours, saving an additional \$87.00 in energy savings alone.
