DESCRIPTION This innovative 4 color RGBW LED Strip Light combines RGB and White into a single 4 in 1 style 5050 LED Chip for brilliant color lighting and effects with the addition of a true cool white (6000-6500K) output. With the 4 in 1 RGBW strip light you can choose from colored lighting for certain events or holidays, and then switch your lighting to a cool white output when functional lighting is needed, or you can always combine the RGB and white output for over 4 billion color options. The ETL Listed RGBW LED Strip has (6) 4 in 1 RGBW 5050 LED Chips every 4 inches, making the outputs twice as dense as our standard RGBW strip. 51W of constant voltage 24VDC power is needed for each 118" strip (5.1W per foot). The LED Strip Light can be controlled using our 4 Channel RGB Controllers or through 4 DMX channels in a DMX universe. This strip light is ETL Listed, RoHS and CE approved.
