DESCRIPTION Our new 12VDC Ribbon Star Max strip lights are equipped with the latest LED technology and highly efficient 2835 size LED chip. The chip density is the same as our old style 3528 chip size Ribbon Star Max with 3 LEDs per 1 inch. The new 2835 size LED chip technology offers brighter lumen output with the addition of CRI 90+ (color rendering index). This makes the light output more vivid and will make colors, displays, and architectural features have much more of a color pop when lit as well as when taking photos. Each strip light is ETL listed for class two circuits and can be cut and re-connected for any linear lighting design. This strip is sold in 3 meter rolls (118") or in increments of half meters (19.5").
