

Product Description

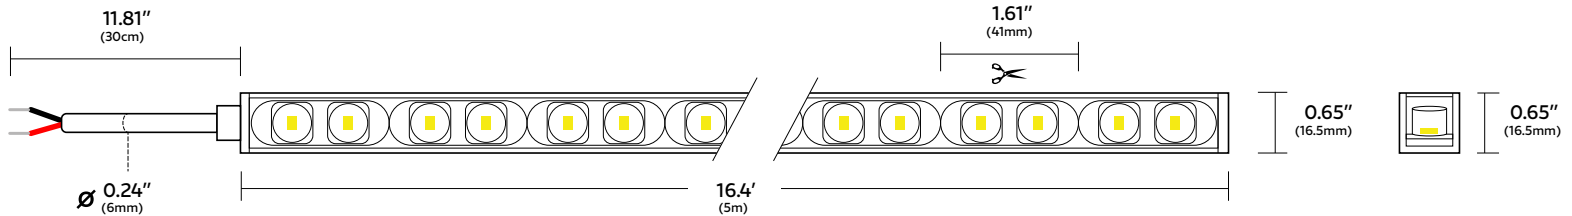

Our 5 meter long linear flexible LED Wall Washers are a unique new product designed with a specialized lens outputting a 30 degree beam angle for casting illumination on walls, ceilings, buildings and architectural features. The free form 3D bending allows for a minimum of Ø200mm bending along both vertical and horizontal axis. The low power draw along with IP65 high quality silicone housing makes this an ideal linear lighting source for indoor and outdoor projects requiring an extended area of radiance from a single light source. This product requires 24VDC constant voltage input.

Features

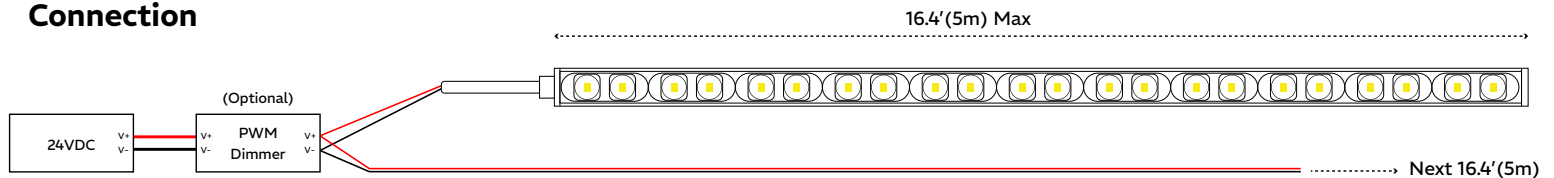

- Dual 3D Bending on Horizontal & Vertical Axis
- Ø200mm Minimum Bending Diameter
- Self Encapsulated LEDs with 30° Lens
- 30,000 Hour Light Source Lifetime
- High Quality IP65 Silicone
- ETL Listed
