

Product Description

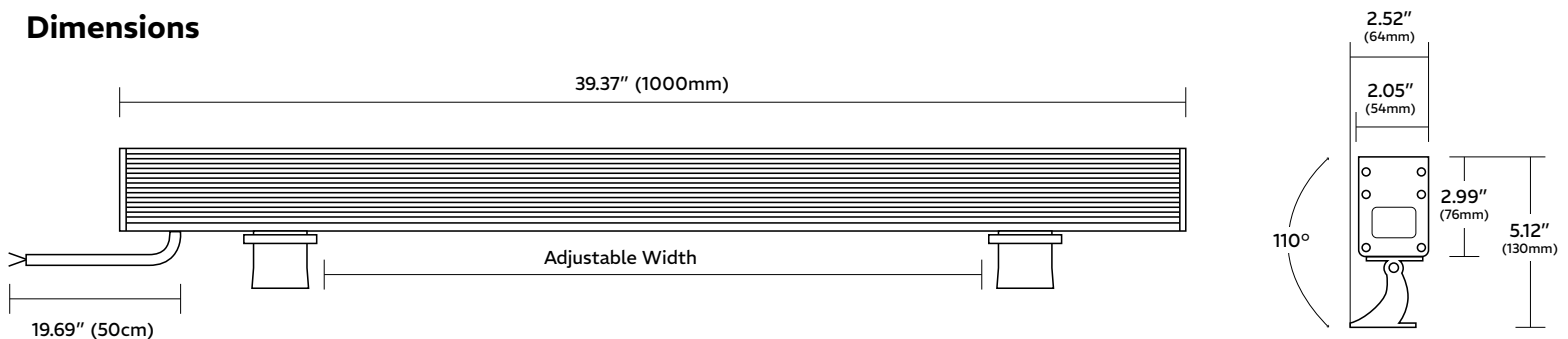

Our 39.37" long x 2.52" wide 4in1 24VDC RGBW LED Wall Washers have 24 Osram LEDs on board to provide ample color changing + 4000K static white output that can create a range of over 4 billion color variations using 255 level grey scale control. Using Red, Green, Blue and a Neutral White color output you can achieve a wide array of color settings as well as static white output that can shine up to 100 feet. Consuming 54 watts of 24 volt DC power each fixture requires at least 2.25 amps of 24V current to operate at full brightness.

Features

- High Quality Aluminum & Tempered Glass Construction
- Corrosion-Resistant Electrostatic Spray Coating
- OSRAM High Efficiency LEDs with Honey Comb Lens
- L70 @ 100,000 hours (77°F)
- IK08 Impact Resistance
- ETL Listed

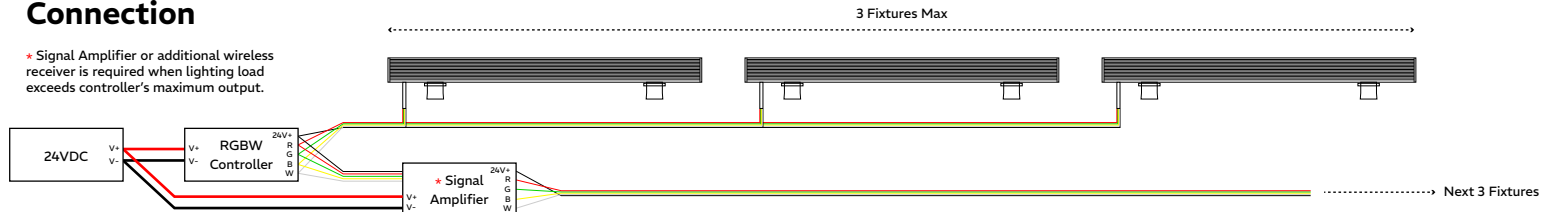

Dimensions

Connection

* Signal Amplifier or additional wireless receiver is required when lighting load exceeds controller's maximum output.
